

Product Development Coordinator / Project Planner

For our client, a high tech multinational in lithography, based near Eindhoven, we are looking for an experienced **Product Development Coordinator / Project Planner**.

In this exciting roll you **facilitates the transition from “project to line organization”** and you “act” as decision maker for operational issues and/or (process) improvements. You ensure that all process-delta’s which are needed to ramp with the new product design are implemented in the operational sectors.

This includes: hardware, commercial options, implementation of hardware redesigns, release for pilot/volume, intro-support and de-wavering.

Educational Level

Minimal level of Bachelor degree, preferably in the area of business engineering or project management.

Experience

- Superior organizational and information management skills;
- Ability to swiftly synthesize in brief structural manner;
- Expert knowledge in the area of Project Management and supportive tooling (EPM tooling, MS Projects, MS Excel, SAP);
- Fluent in Dutch and English.
- 3-5 years of experience as a Project Leader in a dynamic and innovated working environment.

Personal Skills

- Hands-on mentality and result driven;
- Ability to work under pressure and independently;
- General knowledge of legal procedures and accounting;
